Elevation—2600 Feet 1942
MOUNTAIN GROWN **Trees - Shrubs - Vines**

FOREWORD: Conditions imposed by war necessitate streamlining this catalog by omission of descriptions of many plants, which, however, will be furnished on application. WITH MINOR EXCEPTIONS, THERE ARE NO INCREASE IN PRICES.

WAR AND FOOD — The Federal Government asks everyone who has space to plant the vitamin-laden, health-sustaining fruits and berries. No fruit will yield so much, in so short a time, at so little initial cost as Berries, Grapes, Rhubarb. Trail Berry vines and Grapes over fences, outbuildings, or use as ornamental vines.

SHOWY FLOWERING TREES

ALBIZZIA. Persian Silk Tree

A. Julibrissin. "Pink Acacia." 30 ft. Handsome shade and avenue tree highly adapted to California conditions. Fine feathery foliage, pink fragrant flowers in great profusion from July to October. Stands winter as far north as Portland, Oregon. Gal. cans, 50c.

DOGWOODS

Cornus Mas. "Cornelian Cherry." 15 ft. A handsome, large, dense growing shrub or tree, with foliage of graceful shape and pleasing dark green color. Bright yellow flowers borne in great profusion in early spring give way to red cherries size of olives. 3 to 4 ft., \$1.00; 4 to 5 ft., \$1.25; 5 to 6 ft., \$1.50.

Cornus florida. "White Flowering Dogwood." Maine to Gulf States. Shrub or small tree. Foliage wavy, Whitish underneath; Crimson in Fall; flowers White, three to four inches across before leaves appear. Bare root, 18 to 24 in., 75c; 2 to 3 ft., \$1.00.

Cornus Florida Rubra. "Pink Flowering Dogwood." Deep pink flowers, 2 to 3 inches wide, cover the tree before foliage appears in spring. The most beautiful of the Dogwoods. Gallon cans or balled, 18 to 24 in., safe to transplant, \$1.75 to \$2.25.

Cornus Nuttall. "Pacific Coast Dogwood." Splendid tree or shrub for shady places, with profusion of very large white flowers. The red seeds add to its fall beauty when foliage develops its rich red hues. Bare roots, 4 to 5 ft., \$1.25; 5-ft., 5-gal. cans, \$2.75.

HAWTHORNS

Handsome deciduous flowering tree. Of small size and fine habit. The double flowering varieties are a glorious sight in May. If the flowers were inconspicuous, the bright red berries in profusion would warrant planting this tree. Do well in rather dry place.

Paul's Double Scarlet. 15 ft. Flowers deep crimson-scarlet; very double, followed by bright red berries. Bare roots, 3 to 4 ft., 85c; 5 to 6 ft., \$1.50.

Crataegus oxyacantha. "Single White Thorn." A cloud of fragrant white bloom in spring; myriads of bright red berries in fall. Bare roots, 2 to 3 ft., 35c; 3 to 4 ft., 50c; 4 to 5 ft., 60c; 5 to 6 ft., 75c; 6 to 7 ft., \$1.00.

REDBUD OR JUDAS TREE

Cercis canadensis. "American Redbud." Small tree, every twig of which is covered with little pink, pea-shaped blossoms in early spring. Bare roots, 2 to 3 ft., 75c; 3 to 4 ft., 85c.

"Cercis occidentalis. "California Redbud." 15 ft. An exceedingly showy small tree in early spring when covered with small bright cerise flowers. Easily naturalized in canyon or hillside, growing without care and producing a brilliant effect in the spring. Bare roots, 12 to 18 inch, 75c; gallon cans, 50c.

Cercis Siliquastrum. Large shrub or small tree with purplish rose flowers. 18 to 24 in., 75c.

Crape Myrtle. See Page 13.

* Means Native of California.

PURPLE-LEAVED FLOWERING PLUM

Prunus blirieara. Semi-double flowers of soft pink borne on long slender branches. Foliage plum-like and heavily tinged with bronze. Bare root, branched, 5 to 6 ft., \$1.00.

P. pissardi. "Purple Leaf Plum." Leaves deep purple in spring, holding purple longer than any other purple leaf tree. Flowers numerous, white-tinted pink. Fruit reddish-purple; can be used for jams. Bare roots, 3 to 4 ft., 75c.

FLOWERING CRAB APPLES

Malus atosanguinea. "Carmine Crab." Small tree with slender, semi-drooping branches. Single flowers of bright carmine opening from brilliant red buds. Bare root, 3 year branched, 4 to 6 ft., \$1.75.

Malus halliana parkmani. "Parkman Flowering Crab." 8 ft. Rose-colored buds and pinkish white flowers when open. Dwarf habit. A good variety for group and mass planting. 3 to 4 ft., 90c.

Malus purpurea Eleyi. Brilliant purplish red foliage in large, vinous-red flowers in great profusion; the dark red fruits spectacular. 2-yr. branched, 3 to 4 ft., \$1.00.

P. ionensis plena. "Bechtel's Crab." Double pink flowers like small clustered roses; fragrant; late blooming. Bare root, 3 to 3½ ft., branched, \$1.00. 3-yr., 3½ to 4 ft., \$1.50.

FLOWERING PEACH

First Class Heavy Grade Trees

Double Red. Late flowering. 5 to 6 ft., \$1.00; 4 to 5 ft., 85c.

Double White. Large flowers, exquisitely lovely. 4 to 5 ft., 85c.

Double Pink. Late flowering. 5 to 6 ft., \$1.00.

Burbank. Late, very large double pink, edible fruit. 4 to 5 ft., 85c.

Double Cerise. Very fine. 4 to 6 ft., 85c.

Weeping. Semi-double red. Very interesting. Top grafted to give weeping branches. 5 to 6 ft., \$1.50.

FLOWERING CHERRIES

Kwansan. 20 ft. Of upright growth, medium size tree. Flowers double pink, rated as the finest double pink. Bare root, 2 yr., 4 to 6 ft., branched, \$1.35.

Naden. One of the loveliest and the most double pink flowered variety. Bare root, 4 to 5 ft., \$1.35.

Shirotae (Mt. Fuji). The best double white. Flowers are large and full. Foliage light green. Bare root, 3 to 4 ft., \$1.25.

Weeping. Double Pink. Grafted 6 ft. stems, 2 yr. heads, \$2.75, plus 25c for packing if to be shipped.

Weeping. Single Pink. Much smaller ultimate size than foregoing as its branches weep straight down. Clothed with lovely shell-pink flowers. 2 yr. 6 ft. stems, \$2.75, plus 25c packing if to be shipped.

\$10.00 ORDERS FOR ORNAMENTALS PREPAID WITHIN 4th PARCEL POST ZONE

• Many plants through the catalog are priced PREPAID, when not so marked and ornamental plant order amounts to \$10.00 or more, transportation will be PREPAID to your nearest Freight, Railway Express, or Parcel Post destination, if cash accompanies the order, except on balled evergreens, on which one-half transportation will be paid. (Route at our discretion.) Fruit and Nut Trees, when ordered with and in excess of \$10.00 worth of ornamentals will go prepaid. All other plants of mailable size may be had by P.P. within 4th Zone, by adding 15c per plant. Any excess payment will be refunded or extra value in plants sent. Unless pruned back, trees 4 to 6 ft. and larger, not mailable. Combine orders with your neighbors and save transportation charges.

@ This symbol means we have smaller sizes, 50c, 75c.

B&B Means with earth-ball wrapped in burlap.

ROSES—3 for \$1.00

Postpaid to 4th Zone

BUSH ROSES

REDS

Christopher Stone. One of the two best new red Roses of the past half-dozen years. Glowing, brilliant crimson-scarlet, with deeper dusky shadings as the flower ages. It never has a trace of blue at any time. The fairly long buds open into magnificent flowers of great substance with delightfully spicy fragrance. 50c each.

Ettoile de Hollande. This magnificent red rose is ranked among the first three of its color by everyone who knows roses, and many will place it first. Perfect buds are medium size, opening beautifully and cleanly into glorious flowers with incomparable fragrance. Bush is strong, free branching, healthy. Actually has no serious fault. You can pay fancy prices for Patented Red Roses and get no finer results.

Grenoble. HT. Fast becoming very popular. A profusion of long-stemmed, glowing scarlet-crimson blossoms, very fine for cut-flowers, sweet perfume, dark green disease-proof foliage.

McGredy's Scarlet. It might be scarlet in some climates, but is a vivid deep rose here in California, sometimes with a scarlet glow in the early morning as the bud opens. Great strong four to five foot bushes, loaded throughout the summer with long-stemmed buds every one long, slender, and beautifully shaped.

Night. One of the darkest of all Roses, deep crimson shaded black and maroon. Buds and flowers well shaped, quite double, has spicy clove and cinnamon fragrance. We consider this to be the best of the deep dark reds, much better than the over-publicized Nigrette. 50c each.

Southport. One of the finest red Roses, being an exceedingly brilliant scarlet. A great quantity of lovely, slender buds on long stems; excellent for cutting and effective under artificial light. Opens quickly into a good sized, loose, perfumed bloom. Strong growing, No. 1 grade, 50c.

Victoria Harrington. A magnificent bud and flower of a uniform shade of velvety dark red, with a peculiar brick-red undertone. The color does not fade in the hottest sun and remains the same until the petals drop. The petals are beautifully reflexed, stems long and stiff, foliage splendid on tall willowy plant, fragrance is pleasant.

BUSH ROSES

PINK SHADES

Charles P. Kilham. Has many of finest characteristics of that old favorite, Mme. Edouard Herriot, with a more brilliant coloring of coral-red and orange, and has long, straight stems for cutting, large foliage, and a slight fragrance. Vigorous and widespread.

Dame Edith Helen. H. T. Free flowering strawberries and cream pink. Perfectly formed flower. Fine to cut.

Director Rubio — (HT) Flowers have large thick petals interspersed with short curled ones which give them a peony-like form. Buds are dark carmine opening to a warm, rich pink. Strong stems.

The Doctor. This glorious great light pink flower has made a place for itself by the sheer beauty of the enormous, delicately colored, heavy petalled pink blooms, which are so big sometimes you can hardly believe them real—6 inches across with buds in proportion. Exquisite, silvery pink flowers, with intensely sweet fragrance. 60c each.

BUSH ROSES

WHITE

McGredy's Ivory. HT. Creamy ivory-white, turning to clear white as they open; occasionally has a faint pink flush in the center in cool weather. The buds are as perfect as Roses can be; flowers possess a delicate Damask perfume.

BUSH ROSES

Multi-Colors

Autumn. Full handsome buds are a superb burnt-orange, the opening flowers heavily suffused with russet-brown and bronzy red all over-laid on a background of rich yellow in a color combination of glorious autumnal foliage. Deliciously fragrant.

Hinrich Gaede. Without doubt one of the best roses introduced in recent years. Rosy copper with brilliant orange tones which hold until the last petal drops. Buds extra large, of good form, borne singly on long strong stems. Blooms freely and the dark glistening foliage is very resistant to mildew.

Talisman. A vividly colored rose justifies all of the fine things that have been said about it. The brilliant coloring is a mixture of orange-scarlet and golden yellow in irregular proportions. Very double, exquisitely shaped, borne on long stems, exceedingly sweet scented.

BUSH ROSES

YELLOW AND ORANGE

Golden Emblem. The lovely long buds of golden yellow are beautifully tinted with crimson on the outer petals. Opens to a full golden yellow flower. The glossy green foliage is particularly fine, does not mildew, and the buds are borne on long stiff stems.

Gruss An Coburg. Delicate apricot-yellow, shaded coppery-pink with deeper shadings at the center. A lovely rose on long non-branching graceful stems, and fragrant.

Sister Therese. Remarkably vigorous, free-branching. The long, tight buds are always perfect, with enough petals to keep well as a cut flower. Chrome-yellow buds tinged with carmine lighter yellow open blooms, spicy fragrant, with deeper tones of apricot and gold. No. 1 grade, 50c each.

POLYANTHA ROSES

EVER-BLOOMING BABY ROSES

Cecile Brunner. The miniature flowers of this old favorite, rose pink shaded salmon, fill a niche no other Rose can occupy. A strong grower too, and always in bloom.

Gloria Mundi. The little double flowers, like baby pompon chrysanthemums, have the brightest and most striking color in the Baby Roses—brilliant, luminous, orange-scarlet—borne in great clusters which almost cover the plant. No. 1 grade, 50c.

Miss Edith Cavell. Small semi-double flowers of brilliant scarlet-red, shaded crimson. The color does not fade in hot weather. 18 inches.

LOW HEDGE ROSES

Polyantha type make brilliant everblooming edging. Can furnish small sizes for this purpose @ \$2.50 per 10; \$20.00 per 100.

TRIED AND TRUE

Hundreds of new roses come out each year, a large majority falling out along the way. Our list comprises outstanding sorts proven satisfactory everywhere.

PATENTED ROSES

Of the many that are advertised we list only the climbing FLASH, but we will obtain these Patented kinds at their advertised price.

1 1/2—Two-Year-Old Field Grown.

Bare Roots

Each: 3 for \$1.00; 12 for \$3.85, Until
March 25th, 1942, Only
(Except as Noted)

CLIMBING ROSES

A climbing rose will produce as many flowers as a dozen bush roses. Most varieties will not flower the first year, but practically all sorts will yield a wealth of bloom the second year. They may be trained against walls or fences and many of the vigorous growers will climb quickly into the branches of tall trees.

RED

Climbing Chas. P. Kilham. H.T. A strong grower with large full flowers of coral-red flushed with orange and scarlet.

Climbing Hoosier Beauty. Of strong vigorous habit, bearing beautiful long buds of an intense rich, dazzling crimson-scarlet.

Paul's Scarlet Climber. (Improved.) An intense vivid scarlet, semi-double, very freely produced in clusters of 3 to 20 blooms on long much branched canes, the plant being a mass of color from top to bottom. The flowers do not fade and there is nothing to compare with it for striking effect.

PINK

Climbing Cecile Brunner. This famous climbing Rose, with its quantities of perfect miniature pink buds and flowers, is a favorite in California. Exceedingly vigorous, with dense handsome foliage. You can cut a bouquet of beautiful buds from it almost any time in the year.

Climbing Dainty Bess. The dainty, single, amber-pink flowers of Dainty Bess is available now in a climber. Imagine having a large climbing plant of it covered with hundreds of blooms instead of a half a dozen. 50c.

Cig. Mme. Edouard Herriot. (Daily Mail) Brilliant coral-red buds opening to flowers of flaming pink and orange. Flowers are slightly larger and more brilliant than those of the bush type and equally floriferous.

Climbing Rose Marie. HT. The beautifully formed rose-pink flowers are larger than on the bush form; they are borne in greater profusion all during the spring, summer and fall and they are just as fragrant.

YELLOW—GOLDEN

Climbing Golden Emblem. HT. It produces great quantities of the same highly colored buds of golden yellow with brilliant red shadings, which are so much admired on its bush form. Extremely vigorous, rampant grower, with enormous heavy canes 6 to 10 feet long.

Climbing Lady Forteviot. The beautiful glossy foliage and golden yellow buds flushed with apricot which are so much admired in the bush form of this Rose are multiplied in number many times in this climber.

MULTI COLOR

Cig. President Herbert Hoover. Beautifully formed, large blossoms and very fragrant. A charming combination of cerise-pink, flame, scarlet, and yellow, with broad, thick petals, retained for days after the flowers have fully opened. The foliage is clean and handsome.

Climbing Etoile de Feu. Translated into English, is "Star of Fire" which describes it exactly, for its big, wide-spreading flower is crowded with stiff petals to the very center, radiating out to make a great star-like flower of flaming, pinkish orange. Glistening healthy foliage.

Flash. Patent 396. An All-American Rose selection. Luminous-orange-scarlet petals with gold reverse. Climbs vigorously and blooms almost continuously from April to November. The most brilliant climbing rose yet introduced. \$1.00.

Climbing Talisman. It is difficult to imagine anything more striking than a fence or trellis covered with the lovely red and gold flowers of the much admired Talisman.

Offers Nos. 1, 2 and 3 includes trees, and tree protector for each tree, and Sales Tax in California.

No changes can be made in above offers. Five trees makes fine ornamental group.

Filbert Varieties

Barcelona. The best commercial and home variety; introduced and named by Felix Gillet. Our plants are therefore genuine, being direct from the original mother tree. Its value for the grower of market nuts lies in its heavy yield, large size, good appearance, strong growth and disease resistance. The nuts are not retained in the husks, and are fine quality. All drop to the ground over a period of three weeks during September. One inch broad by 3/4-inch thick. Round or nearly so, color brown, bright and handsome. Borne singly and in clusters of two to six. Must have a pollinator, see below. Will bear well in part shade.

Purple Leaf Aveline. A beautiful ornamental variety. Believed to be pollinated by Daviana. 40c to \$1.50 each.

***Nottingham.** Probably the best pollinator for Barcelona and DuChilly. Nuts are small but good flavor and tree bears regularly good crops. Trees of this variety are lighter grade than Barcelona, not being as vigorous a grower.

Prices on Nottingham are 15c higher than the list.

***Merville de Bollwiller.** A round, point-nut of good size and quality.

***DuChilly.** Large, over 1 inch long by 3/4-inch broad, flattened. Excellent quality, good bearer. It pollinizes Barcelona and is pollinized by Barcelona, Nottingham and Daviana.

*These varieties will pollinize Barcelona and will be sold only in connection with Barcelona.

PLANTING AND CULTURE OF FILBERTS

METHODS OF POLLENIZING

(A) Plant solid to Barcelona. After third year top, graft one limb of each tree to Nottingham or White Aveline. Then put in grafts scattered through the planting of DuChilly, Daviana, White Aveline, Cosford; either several or all, to extent of ten assorted pollenizers per hundred of Barcelona. We will furnish grafting wood of these varieties.

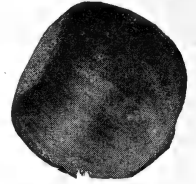

(B) Use 11% assorted pollenizers scattered through the planting, as shown above, to every hundred Barcelona. Every third tree in every third row planted to a pollinator is 11%. This method cuts down the number of Barcelona trees per acre and yield will probably be less than by first plan, or a combination of A and B.

SOILS FOR FILBERTS

They will grow in most any soil, shallow or deep, as they are shallow rooted. Best results are obtained on soils that are not heavily acid, but a slight acidity is not harmful.

DISTANCE APART TO PLANT

On good soils, plant 20 to 25 feet apart. On poorer soil, 16 to 18 feet. Either square or triangular planting is satisfactory. For windbreaks or hedge-rows, 6 to 10 feet.

COLOSSAL. Actual Size.

(Our Introduction)

COLOSSAL. Our introduction. An Asiatic hybrid. Extremely large nuts that FALL FREE FROM THE BURR. Ripens in September and brings high prices, being first in the market. Quality good. Quercy and French Marron pollinates it. Using 1 Quercy to 8 Colossals, this variety produces **BIG PROFITS**. The nuts are big, the crop is big, the profits are big. Matures nuts in September. Whole crop is down in 10 days or two weeks. Original tree produced 300 lbs. in 1939 and it is a small tree, compared with other chestnuts.

FOUNTAIN CHESTNUT

Here is a striking and unusual foliated tree, every leaf being different. Some only one-fourth inch wide but eight or nine inches long, giving trees remarkable fountain-like effect. Heavily branched specimens, 6 feet and up, \$3.75 each. Small trees, \$1.00 to \$1.50.

QUERCY — HEAVY BEARER

Quercy. A French Marron of large uniform size. Introduced many years ago by Felix Gillet. Nut is round and glossy, dark rich brown, selling instantly on its appearance. Of heaviest consistent bearing. The most precocious bearer we have ever seen. Sets burrs three months from the graft. Matures nuts late and is in prime condition for the holiday trade. While not as good eating quality as the others listed, it can be counted on to stack up tonnage and profits. **80% fall free from burr.**

SEED GROWN TREES

Hybrid—These are from our Large American Sweet variety. Trees of this type are likely to produce fine new sorts. Most of them drop free from burrs and are of sweet taste.

Italian or Spanish—Seedlings of the European chestnut. While not so large as the Marron type, they bear good quality nuts of fair size and do well under severe conditions.

Japanese. Very large. Hardy. Said to be Blight Resistant. Bears young. 8-15 inch seedlings \$12.50 per 100; \$1.50 per 10.

FRENCH MARRONS

These large and fine chestnuts are grown by us from selected seed which produce abundantly almost without exception. Often bear the third year from planting. Vigorous 1 and 2 year trees, priced above. **MAKES A SPLENDID SHADE TREE.**

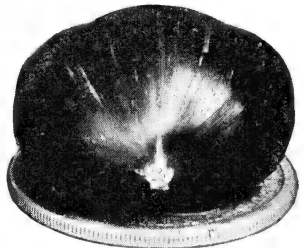

CHESTNUT TREES FOR SHADE

We Offer Selected, Well-Branched French Marrons at Prices Shown on Page 7

How to Plant—On heavy, rich soil plant 60x60 feet. Poorer land 50x50, or if space is limited, 40x40. The chestnut requires plenty of light and air. Sixty feet between the rows and 30 feet apart in the row is the best plan. This takes 24 trees to the acre. Take out every other tree in row before they crowd. This plan allows inter-cropping of the wide row for a number of years. Seedling trees may be used for the interplants.

Planting—Dig holes 2x2 feet all around. With sharp knife remove broken roots and cut ends of all roots to sound wood. Remove all buds below ground-line. Plant tree not deeper than before. Use only top soil (well firmed with ball of foot) about the roots. Tie tree firmly to stake soon as planted. Set stake while planting to avoid driving it into roots. Cut back whip trees one-half and allow one strong shoot to grow to six feet where it may be headed. Branched trees cut back to 3 or 4 branches and head in branches to 3 buds from trunk. Encourage growth to one central leader, which is Nature's way. **DON'T TRAIN TO VASE FORM**, as trees will split apart with weight of the crop. Shade trunk for first few years with Yucca Tree Protectors (see page 12) or two thin boards.

Cross-pollination—More than one variety should be planted, both for benefits of cross-pollination and to lengthen out the harvest season. Our Quercy and French Marron varieties have an abundance of pollen.

50 at the 100 rate.

Grafted on two-year Northern California Black. Others may quote lower prices on Walnuts, but the root-pruned trees we offer with many fine roots to enable the tree to quickly re-establish itself are worth the extra cost.

Vrooman Franquette. Very hardy, late blooming. Very large handsome nut of extra fine quality, commanding 5 cents per pound premium. Resists blight. Thomas Black (see below), will pollinate Franquette.

Mayette. Nuts large, roundish, broad at base. Shell thin, kernel full, sweet and rich. A regular heavy bearer. Blooms earlier than Franquette, but later than Payne.

Cluster Mayette. A self-fertile good sized, good quality nut that blooms mid-season, with Eureka. Bears young. A good home orchard variety. Sets nuts in clusters of two to four. None of 2-year.

5 at 10 rate; 50 at 100 rate.

Grafted on Northern California Black Walnut.

Thomas. An improved Eastern Black Walnut. Cracks out the meat in whole or large pieces. Nut and kernel large, excellent quality. Abundant and early bearer. Thomas is rated as good pollenizer for Franquette.

PECANS

Grafted Trees, 4 to 6 ft., \$2.25 each

Burkett. In California the trees that have come into bearing have borne very heavy crops. Nut is large, almost round, thin-shelled, the whole meat coming out very readily. A beautiful shade tree.

Pride of Merced. A large nut of excellent quality. Developed for California conditions. Interpollenates with Success.

Success. Large, oblong, medium thick shell, kernel of finest flavor. This variety and Burkett are said to bear well by themselves.

ALMOND

	Each	10
4 to 6 ft. per each.....	\$.60	\$.50

Varieties — Ne Plus Ultra and Nonpareil, which should be planted together. Best kinds for home use.

BUTTERNUTS

Juglans cinerea. The genuine old butternut that you have to "wrassel" to get the meat out. Makes a good shade tree. Meats are sweet and rich. 8 to 12 inch, 35c; 12 to 18 inch, 50c; 18 to 24 inch, 60c; 24 to 30 inch, 75c.

HICKORY NUTS

Shagback. The sweetest nuts of all. Makes stately tree. 6 to 8 inch, 25c each. Hickory nuts to eat, 25c lb.; 3 lbs. for 75c; 5 lbs. for \$1.00; 10 lbs., \$1.75. Postpaid to Fourth Zone.

CARE OF TREES

Unpack without exposing roots longer than necessary. Dig a trench in loose soil 2 feet wide, 14 inches deep. Cut strings and put trees in side by side; cover roots with fine earth, filtered in among the roots. Water well when the trench is half full; fill in trench.

Pruning Roots and Tops. With sharp knife trim off broken roots and bruised ends of roots of all deciduous trees and shrubs. The tops of deciduous trees and shrubs should be pruned in proportion to the amount of roots lost in transplanting. Usually remove 1/2 of top growth. Most evergreens from cans or that are balled need no pruning when planted. **If requested to do so we will prune back all plants before shipping.** Do not cut top off Birch trees.

The Importance of Staking. Tall deciduous trees should be firmly staked when planted.

After Care. Never let trees get dry during the first summer, often see that they get a thorough soaking. This is vastly better than giving them a little water at a time. Keep the ground around your plants and trees thoroughly loose. A good mulch is a great help.

Safety and Protection. In nearly all cases it is advisable to give the trunk of deciduous trees protection to guard against sunburn. This is done by giving the trunk a thorough whitewashing to the first branches and then placing the Tree Wraps listed on Page 12.

Wire Tags. Should be removed when planting or they will girdle tree.
